

I think there is significance in the Nixonian changes in CIA, Colby, Graham, Sillen, etc. It is as rumored, part of a conversion of the agency into a vehicle for saying what GL wants said. Of course also doing. It also marks the rewarding of error as the marking of wrong into right by rewarding, elevating and giving power to the wrong. More wrong, unchanging, perhaps. It is also an increase in the power and influence of the military and the military mind. I do not anticipate an end to dirty tricks under Colby -or anyone else. Pentagon Paper vengeance? Ref.
